BACKGROUND

Brackley Swimming Club was formed in 2022, recruiting swimmers from the local community and with real ambitions to grow while remaining an inclusive club for all. Centre Manager Michael Lowe explains, "We're not just interested in competitive swimmers, but anyone that wants to take that next step in their swimming journey."

The community grant funding has been put towards the purchase of backstroke ledges and other vital equipment for the club.

This additional equipment is crucial to expanding the kit available to swimmers, increasing the capacity of each session, meaning more participants can be involved and the club can grow.

"As the club is new, it does have some financial restraints," said Michael.

"Funding like this is vital to expand the equipment available to the swimmers and is really appreciated by its members."
